
JOB ROLE	Magento 2 Developer
Location	Bangalore
Job Type	Full-time
Salary Offered	Competitive package and benefits

This is a great opportunity to join a busy team working on many Magento e-commerce websites for various high net worth companies, famous museums, and many more; also responding to 50-100 inbound support requests a week for e-commerce software support.

We're on the lookout for a passionate developer who immerses self in e-commerce websites development - your main role will be to understand client's requirements, develop web pages in Magento that are responsive, test and integrate them to the satisfaction of all the stakeholders. The role will suit an IT Graduate with a qualification in computer sciences, programming or similar, with Magento 2 skills.

About You ...

- Must-Haves: HTML5, CSS3, ASP.net, JSP, REST, SOAP, PHP
- Experience in gathering and analysing business requirements to meet strategic goals and development efforts
- Should have integration experience with Salesforce and APIs in general
- Excellent knowledge of Web platforms, technologies, protocols, and publishing tools: HTML5, CSS3, XHTML, HTTP/S, SOAP, PHP, MySQL, JavaScript.
- Experience creating and maintaining Open Source content management systems, preferably WordPress or similar
- Ability to update, repair, modify and expand existing programs and CMS to include Web 2.0 technologies (blogs, user profiles, tags, etc..) and functionality
- Experience working with the e-commerce solution Magento 2 and integration using APIs is required.
- Must be familiar with relational databases, integration, database caching, database optimisation and MySQL queries as well as object-oriented databases
- Understanding of object-oriented programming languages; C#
- Experience with AJAX, Photoshop and Adobe FLEX is beneficial
- Understanding session management, SEO Methodologies, login profiles, single sign-on
- Experience using various web API's and building/parsing XML a plus

- Experience with caching and scaling techniques
- Ability to present ideas in business-friendly and user-friendly language
- Experience working in a team-oriented, collaborative environment.
- Able to work and thrive in a fast-paced team environment and flexible to accommodate demanding project schedules
- Have empathetic listening skills, enjoy problem-solving and a naturally positive, can-do attitude
- Have a personable manner with a clear, friendly and confident tone of voice
- Be confident and logical with your approach to IT requirements and a fast learner
- Be organised, with excellent attention to detail and ability to manage multiple responsibilities simultaneously
- Magento Certification (preferred - but not a hard requirement)

You're Ideal If You've Done Any of the Following ...

- You've previously worked on an eCommerce related project
- You've got previous experience working in the marketplaces like Amazon or eBay, using Shopify, Magento or BigCommerce

As a Magento developer, You'll Be ...

Enthusiastic, upbeat individual who is quick to learn, has a genuine interest in online business and the skills and experience to help our clients grow their businesses. You'll also need to be able to keep up with our dynamic Technical Director, helping prioritise the department's key issues while resolving client's queries quickly and efficiently.

Your Role Will Include ...

- Responsible for programming support for new e-commerce site designs and ongoing design changes using a Magento 2 platform with PHP.
- Must be able to work independently as well as in a team to design recommended solutions based on input from our business teams and outside agencies.
- This will require a working knowledge of Magento 2 along with standard web tools and technologies, learning the enterprise-wide technical environment, and consulting with the brand sales team to prioritise efforts.
- After having achieved a standards-based outsourced environment, this role will include managing the conversion of creative designs into technical specifications and then design structure, programming, testing, deployment and maintenance of each corporate web site.
- This role will be an advocate for standards-compliant best practices at all levels of web architecture and development.

- This role will work closely with the brand sales team and IT leaders, on design and development concerns to ensure an effective and efficient workflow for the overall development cycle within given budgetary constraints.
- Maintain, debug, optimise and enhance existing code in place at existing sites
- Participate in and contribute to the planning process for new projects and give input on specific technologies utilised to complete projects
- Work with database administrator to design, develop, and update relational databases as they pertain to Web sites and applications
- Track and evaluate new standards, technologies and trends in Web architecture, development, design, and delivery
- Ensure compatibility of projects with the current system and variety of web browsers, etc.
- Ability to perform unit testing as per the requirements
- Being aware of the project management methodologies like Scrum, Agile, TDD and CI
- Exposure to high volume e-commerce and dealing with spikes in traffic
- Ensuring all support documentation is up-to-date and socialising solutions through our knowledge base
- Working with remote technical teams in Silicon Valley and Bangalore

What you'll need to succeed ...

Our ideal candidate would be a technically-savvy problem-solver who enjoys using their knowledge and skills to address client's enquiries. Commitment and enthusiasm for our services are essential - we expect all employees to contribute to the continuous improvement of the company and be part of our success.

As Our Ideal Candidate, you will ...

- Possess a pro-active and positive approach to problem-solving
- Have a passion for technology, particularly e-commerce
- Possess strong communications skills (both written and oral) and be comfortable using modern technology
- Have the confidence to deal with senior level clients and members of their team
- Be able to think creatively and contribute ideas to resolving client's queries
- Be comfortable using their initiative while knowing when to escalate critical issues to their manager
- Be well organised to ensure that no client queries are lost or ignored
- Be capable of working effectively with our team of customer support agents
- Be reliable and punctual

About 247 Commerce

247 Commerce is an e-commerce agency which designs, develops and integrates beautiful, technically advanced web shops for clients including the V&A Museum, Marks & Spencer, the National Theatre, the British Museum, Royal Navy, and multiple small and medium-sized businesses.

We're an officially accredited Magento Business Solution Partner, offering bespoke web store development services featuring highly customised integrations with client's existing software systems. This usually includes integrations with third-party ERP software, warehouse management solutions, CRM systems, payment gateways, shipping services, as well as a vast range of retail software solutions available on marketplaces.

We're also the developer of 247 CloudHub, a multichannel e-commerce integration tool, which helps online retailers automate key operational processes, reduce costs and manage online selling operations efficiently. CloudHub's modular architecture and highly customisable features provide businesses with a single lightning-fast cloud-based system with all the tools required to scale e-commerce businesses efficiently across multiple websites and marketplaces.

We're looking for someone who combines great listening skills with a courteous manner and who is responsive to clients' needs. We do expect our employees to show commitment to the success of 247 Commerce, and in return, we offer a great package along with a strong commitment to helping you reach your career goals. You'll have plenty of learning opportunities and will work with incredible people on technically advanced e-commerce projects across the retail industry.

How to Apply ...

You would be an IT Graduate with a qualification in computer sciences, programming or similar.

Applications in the form of a CV, which emphasises relevant skills and experience, together with a covering email, setting out why you'd like to be considered you for this role, should be sent to: jobs@247commerce.com.

247 Commerce is an Equal Opportunities Employer. It's important to us that 247 Commerce offers an inclusive and fair workplace for everyone. We work hard to offer a flexible working environment for all. We encourage an open and supportive atmosphere, where everyone feels included.
